

OIL COLOURANT

PRODUCT DESCRIPTION

Super high-quality pigment specifically formulated to give superior colour saturation. Concentrated Woodgrain colourant can be used with Oil Scumble and Extra Pale Varnish.

Concentrated colourant can be used with all oil based decorative glazes and varnishes used in the theatre, film, scenery decorative paint industry.

Contains a blend of organic pigments dispersed in white spirit

The pigment content is approximately 40%, the particle size is 5m.

All colourants are intermixable to give any colour woodgrain.

available in: mahogany dark oak, pine, medium oak, light oak teak and walnut.

Transparent, opaque iron oxide and carbon black dispersions for natural wood shade formulations.

A range of organic and inorganic dispersions for decorative fashion colours and natural shade tinting.

Optimum pigment Color and strength.

High transparency with the transparent iron oxide dispersions.

Resin – long oil alkyd based, solvent – white spirit / hydrocarbon distillate.

Stability at high dilution.

Free flowing pigment preparations.

Easily incorporated 'stir in' dispersions

MIXING

Oil Colorants may be added up to a maximum of 10% by weight. But considering that it is highly concentrated, you can obtain best results by adding a minimum.

Ensure product is well mixed, do not mix batch numbers.

Pour the liquid to be coloured into a suitable container and mix with the oil colourant to achieve the desired density.

CAUTION

Concentrated colourant requires very small additions to vary the colour.

Test colour and mix before applying.

COVERAGE: dependant on base medium.

CLEAN UP

Colourant only

Any equipment used can be cleaned with white spirits. Wipe any excess off surfaces

When Mixed with oil product clean using white spirit.
