

# Decking and Fencing Oil

A unique concentrated, one coat, clear, water repellent wax oil coating, formulated for the protection of externally exposed timber surfaces that produces a rich professional semi-gloss finish. The grain and texture of the wood is accentuated and the timber is protected from drying out. The dried coating provides UV resistance, water droplet repellence and protection against moisture ingress, warping, swelling, cracking, and splitting. Ideal for protecting and enhancing the natural beauty of most types of timber decking and fencing and for renovating and restoring colour to old or new timber. Offering UV protection and repelling water, it will deliver a clear satin sheen while protecting from discolouration and fading from the sun, whilst maintaining the finish. Water repellent, does not blister or peel. Create a plethora of colours by tinting with an oil colourant from the Polyvine range. Tint by up to 5% with a colour of your choice.

## KEY FEATURES AND BENEFITS

- ✓ Exterior
- ✓ 1 Coat
- ✓ 12H Drying Time
- ✓ Water Repellent
- ✓ Does not blister or peel
- ✓ Resists blistering and cracking
- ✓ UV protection
- ✓ Renovate and restore exterior timber
- ✓ Microporous

## APPLICATION INFORMATION

Application tools:	Brush, Roller or Spray
Coverage:	16 - 20 sqm per Litre
Drying time:	12 hours

## AVAILABLE IN

Finishes:	Clear satin finish
Sizes:	2.5L & 5L
