

Stone and Brick Protector

For a completely natural finish inside or out, Polyvine's Stone and Brick Protector is the perfect choice. Invisible, penetrative and waterproof, this seals and protects without changing the appearance of the substrate – all with one coat.

This is a high-performing stone and brick coating that's absorbed into the substrate, for ultimate protection and a beautiful finish, with ultra-low solvents and ultra-low VOCs (under 1g/l).

A water-based masonry protector and water repellent, it penetrates porous substrates to form a barrier to water, moisture, grease, oil acid, alkali and salts. It'll also suppress mould and fungal growth, and the formation of salts on natural masonry surfaces.

KEY FEATURES AND BENEFITS

- ✓ Exterior and Interior
- ✓ Waterproofs brick and stone
- ✓ Suppresses formation of salts
- ✓ Improves weatherability
- ✓ Moisture barrier
- ✓ Easily cleaned with mild soap & water
