

HEAVY DUTY EXTREME VARNISH

Our Heavy Duty Extreme Varnish is ideal for use on interior and exterior surfaces that need an ultra-tough waterproof finish with UV protection.

It's the perfect varnish for ultimate protection of interior and exterior surfaces to an industrial level of finish.

UV blocking and absorption reduces greying, ageing and deterioration of surfaces. Biocides protect against mildew, mould and fungus.

It's available in satin and dead flat finishes, and to achieve full UV protection, apply 3 coats of satin before a final coat of dead flat.

Our Heavy Duty varnish range brings the highest protection single packs ever developed.

ADDITIONAL INFORMATION

Always apply to a test area before starting work. Appearance may vary according to the colour, type of surface, and the number of coats.

Do not apply over uncured oil paints.

Dilute 10% with water to prime porous surfaces.

The open-grain texture of Oak will cause film failure.

Do not shake the product.
