

MOULD GUARD FUNGICIDAL CLEANER INTERIOR – EXTERIOR

DESCRIPTION

Mouldguard is a ready-to-use, thixotropic high-performance cleaner that effectively removes dirt, mould, mildew, algae, and fungi. It also sterilizes wooden surfaces to prevent regrowth. This unique formulation ensures that it works equally well on vertical and horizontal surfaces, preparing them for the desired coating.

Mouldguard powerfully and permanently eliminates all types of mould, as well as mildew stains and bacteria. It is an essential pre-treatment for killing existing mould infestations before applying any coating. As a broad-spectrum liquid fungicidal cleaner and surface sanitizing agent, Mouldguard is designed to clean the timber and eliminate common black mould on surfaces.

Polyvine Mouldguard fungicidal cleaner uses innovative technology that removes all hazardous solvents and alkalis and replaces them with water, making this a safe and environmentally responsible product. Safe to use on any type of wooden surface - no efflorescence on any type of substrate (porous or non-porous). Wood (hard & soft).

Biocide boost - The finished surface remains free from mould, algae and fungus. Inside and outside.

FOR USE ON

All internal and external woodwork.

UNIQUE SELLING POINTS

Complete biocidal protection for wood. Removes mould prior to decorating. Minimum VOC
Biocide boost - the finished surface remains free from mould, algae and fungus. Inside and outside.
Powerful fast-acting formula. A penetrating biocidal cleaner to kill mould hyphae.

SURFACE PREPARATION

First, remove surface debris and organic growth by scraping and brushing. All wooden surfaces must be scraped to a porous surface ready for MouldGuard application.

APPLICATION

For optimal biocidal effectiveness, apply the treatment to dry surfaces. You can use a brush, roller, or spray application at a rate of 4-6 square meters per litre, depending on the porosity of the substrate. After applying the treatment, scrub the areas with an appropriate brush and let it sit for up to 20 minutes. It may be necessary to repeat the process for heavily contaminated areas. Ensure the Mouldguard does not dry out if you are primarily using the product as a cleaner.

Biocidal protection. When treating wood, before re-coating to ensure the fungus/mould does not reoccur, allow the treatment to remain for 24 hours to maximize its biocidal effect by allowing the solution to penetrate the wood. Finally, rinse or wipe down the treated surfaces with clean water to remove residues and dead growth. Allow the area to dry completely before proceeding with any further treatment.

CAUTION

Always apply to a test area before starting work.

COVERAGE

4-6 square meters per litre, depending on the substrate.

PACKAGING

available in 1 litre, 4 litre.

STORAGE

Protect from extremes of temperature during storage and application.

Store in unopened containers in a cool dry place away from direct sunlight.

Shelf Life - Many years in tightly sealed container

HEALTH SAFETY AND THE ENVIROMENT

May cause skin irritation.

Causes serious eye irritation.

Harmful to aquatic life with long-lasting effects.

If medical advice is needed, have the product container or label available.

Keep out of reach of children.

Wash hands thoroughly after handling.

Wear protective gloves, protective clothing, eye protection, and face protection.

IF IN EYES: Rinse cautiously with water for several minutes. If contact lenses are present and easy to remove, do so. Continue rinsing.

CLEAN UP EQUIPMENT

Any equipment used can be cleaned using soap and water. Wipe any excess off surfaces with a damp cloth.

DISPOSAL

Look for special facilities locally. Do not empty into drains or watercourses.
