- ✓ Antibacterial
- ✓ Low-foaming formulation
- ✓ Leaves no residue or streaks
- ✓ Fresh, clean fragrance
- ✓ Economical concentrate for regular maintenance
- ✓ Suitable for domestic and commercial use

APPLICATION INFORMATION:

Polyvine FLOORCLEAN PRO can be used for regular mopping or in a machine. Dilution: Concentrate: Normal cleaning: 50ml (1 capful) to 5L of water (1%). Heavy Soiling/Mechanical Use: 100ml (2 capfuls) to 5L of water (2%). Pour into a vessel filled with 5L of clean warm water and gently stir until all product dissolves. Apply the solution generously with a mop or other suitable equipment and leave for 5 to 15 minutes. Clean the surface in the longitudinal direction of the floor. Do not allow the solution to dry on the surface being cleaned. On large areas the process needs to be carried out in sections. Use a mop or sponge to clean the surface. Heavily soiled areas should be gently agitated with a bristle brush. Repeat application process if required and finally rinse the cleaned surface thoroughly with clean water. Use a well wrung cloth, mop or scrubber-dryer machine with low dispensing of water. Note that excessive use of water may damage the floor. Observe recommendations from flooring and floor coating manufacturer. Dilute concentrate according to recommendation. Note that excessive use of water may damage the floor.
